LE MAGNIFICHE CARATTERISTICHE...

La fibra di latte ha proprietà uniche. È antibatterica, ipoallergenica, traspirante e termoregolatrice. Al tatto è estremamente soffice e setosa, dando a chi la indossa una piacevole sensazione di comodità.

LA PRODUZIONE MIGLIORATA...

La produzione avviene attraverso un processo controllato in cui la caseina, nobile proteina del latte, viene separata dal siero e denaturata. Da questa vengono estratti gli amminoacidi che sono poi additivati ad una soluzione filabile di Viscosa ed estrusi, ottenendo infine la fibra.

I NOSTRI FILATI UNICI...

Cotonificio Olcese Ferrari utilizza questa preziosa materia prima in puro o in mischia con fibre pregiate come la lana, il Cotone e il Tencel™, realizzando filati unici che puntano all'alta qualità e al massimo comfort.

THE MAGNIFICENT PROPERTIES

Milk fiber has unique properties. It is antibacterial, hypoallergenic, breathable and thermoregulatory. It is extremely soft and silky, giving a pleasant feeling of comfort to the wearer.

IMPROVED PRODUCTION

The milk fiber production takes place through a controlled process. The casein, the noble milk protein, is separated from the whey and denatured. The extracted amino acids are then added to a spun Viscose solution and extruded, finally obtaining the fiber.

OUR UNIQUE YARNS

Cotonificio Olcese Ferrari works this precious raw material pure or blended with fine fibers like wool, Cotton and Tencel™ to produce unique yarns characterized by high-quality and maximum comfort.
